Human Resource Management

eNETEmployer - Human Resource (HR)

Deal with personnel management issues easily using the integrated HR module. Coordinate employee compensation, benefit entitlements, work leaves, employment equity, group insurance, staff evaluations, performance reviews, training programs and much more.

Human Resource Module

The HR module helps you to work easily with all types of personnel management issues. View each aspect of your organization's human resources to coordinate employee compensation, benefit entitlements, staff leaves, employment equity, group insurance, employee evaluations, performance reviews and much more.

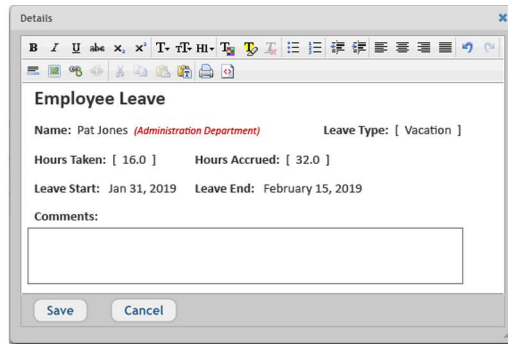

eNETEmployer's multi-user technology allows for authorized personnel to administer a full suite of HR functions securely and efficiently. Your company's employee and HR data is available 24/7, and easy to maintain by your HR managers and administrators.

Custom HR Events and Tasks

Manage all types of incidents and workplace events including employee reviews, accidents, labour grievances, skill updates, absence management, company equipment, employee training courses, and more.

Include detailed incident accounts including the dates that an incident occurred, the personnel involved, and any ongoing and followup actions.

Use the Document Storage feature to include detailed documents, PDFs and attachments for all incidents and events.

Freeform data fields allow you to customize each incident and event to suit your task and workflow.

Training Course Management

Create custom questionnaires and quizzes for your company training courses, and then assign courses to individuals or groups of employees.

When employees take a course, their results and score are submitted to your HR team for review.
